

RUSSELL MORBEY

Junior Software Engineer

Location: London | Email: russellmorbey@hotmail.co.uk | GitHub: <https://github.com/Rmorbey>

Portfolio: <https://www.russellmorbey.co.uk> | LinkedIn: <https://www.linkedin.com/in/russell-morbey-706063246/>

Profile

Junior Software Engineer and Makers Academy graduate with production experience deploying a React [Portfolio website](#) and FastAPI backend for my personal fundraising tracking app [Ready & Raising](#). Strong in Python, React, and test-driven development. Eight years in SEN education developed communication, mentoring, leadership and calm problem-solving under pressure. Seeking an entry-level/junior software engineering role in the UK.

Key Skills

Languages: Python, JavaScript, HTML, Ruby

Frameworks/Libraries: React, FastAPI, Selenium, Bootstrap

Tools & Practices: Git, Docker, REST APIs, TDD, Agile/Scrum, CI/CD basics, Kanban, Jira

Cloud & Data: Microsoft Azure (Form Recognizer), DigitalOcean, Supabase

Technical Experience

Software Engineering Intern | Goodlord | Oct 2022 – Jan 2023

- Built Python/Selenium automation to complete council occupancy forms, reducing manual data entry for internal teams.
- Developed React components for the tenancy journey, improving user flow, accessibility, and customer experience across the platform.
- Integrated Microsoft Azure Form Recognizer with a C# parser to extract fields from bank statements.
- Supported fellow interns on Python, Selenium, and React blockers during pair programming and code review.

Technical Projects

[Ready & Raising](#) | FastAPI, Docker, Supabase, DigitalOcean

- Unified fundraising (JustGiving) and training/activity data for supporters via a production REST API.
- Implemented hybrid caching (in-memory, local JSON, Supabase) for performance and resilience.
- Added API key auth, rate limiting, health checks, metrics, and structured error handling.
- Deployed via Docker on DigitalOcean; documented API architecture and endpoint behaviour.

[Portfolio website](#) | React, Node.js, Express, ButterCMS

- Built and deployed a responsive portfolio at [russellmorbey.co.uk](https://www.russellmorbey.co.uk) showcasing projects and technical skills.
- Integrated headless CMS (ButterCMS) for maintainable content updates.
- Built multi-route React app with lazy-loaded pages and a live fundraising dashboard consuming production API.

Education

Software Engineering Bootcamp | Makers Academy | Apr 2022 – Jul 2022

- 16-week intensive programme covering TDD, OOP, Agile, and full-stack development.

BA Acting and Contemporary Theatre (First Class) | East 15 Acting School | 2009 – 2013

Previous Experience

SEN Teaching Assistant | Samuel Rhodes School | Feb 2020 – Dec 2021

- Mentored new teaching assistants and delivered tailored learning resources for students with additional needs.
- Led communication and independence sessions; built accessible materials where none existed.

SEN Agency Teaching Assistant | Sugarman Education | Dec 2013 – Feb 2020

- Worked across mainstream and SEN settings; adapted quickly to new teams and students' needs.
- Managed challenging 1:1 support cases in high-pressure environments.
